

ExpressLunch!

ExpressLunch! Is not available in all markets.

ExpressLunch! provides a *post billing* capability, in a cafeteria line environment (in some cases it can be offered in a classroom serving environment). Where offered, a caterer representative will be available to offer a meal and record the transaction in LunchDirect, at which point the parent/guardian may settle the amount incurred by logging into their account.

If lunches are available from the caterer, it will be provided to the student without a meal, and recorded in the parent account. Detailed information will be kept in the Payment History.

An email will be sent to the parent/guardian notifying them that an **ExpressLunch!** was provided to their child, along with a notification to sign into LunchDirect and settle the debt.

It is a post payment applied to the parent/guardian account with an open debit. The parent/guardian should settle the open receivable and zero out the debit.

The school will assist in handling the collection, if needed.

Questions related to the charge should be directed to the Caterer, or to the representative in the lunch line.
